Imad EL BADISY

elbadisyimad@gmail.com · elbadisyimad.com · github.com/ielbadisy · Google Scholar · LinkedIn

PROFILE

Research Engineer in Biostatistics working at the interface of computational biostatistics and machine learning. My work focuses building methodological tools for health data science supporting biomedical research projects. I develop open-source R packages for survival analysis, missing data, and interpretable machine learning, and contribute as a consultant and trainer in biostatistics and health data science.

EXPERIENCE

Mohammed VI Center for Research and Innovation (CM6RI) — Rabat, Morocco
Research Engineer in Biostatistics — Nov. 2021 – Present

- Leading the structuring of an emerging AI and Data Science service
- Conducting methodological and applied research in health (oncology, fertility, other biomedical domains)

The GRAPH Network — Switzerland / Remote
Data Science Education Officer — Sep. 2023 – Dec. 2023

- Designed and delivered training programs in data science for global health
- Developed educational material and course content for data science learners

Institut Mines-Télécom, IMT Atlantique — Brest, France
Research Engineer in Applied Statistics — Sep. 2019 – Sep. 2021

- Conducted statistical analyses of national health data (SNDS-based analyses)
- Implemented automated and reproducible data workflows

INSERM — Clermont-Ferrand, France
Biostatistician — Jan. 2019 – Jun. 2019

- Conducted cost-effectiveness evaluation of a clinical protocol on ketamine for chronic pain

Université de Sherbrooke — Sherbrooke, Quebec, Canada
Health Economist Intern — Feb. 2017 – Sep. 2017

- Conducted a systematic review and meta-analysis on health utilities in cancer patients

EDUCATION

Aix-Marseille University, SESSTIM — Marseille, France
Ph.D. Candidate in Biostatistics — 2021 – 2025

Thesis: Missing Data and Machine Learning Methods for Survival Analysis · Supervisor: Roch Giorgi

Aix-Marseille University, SESSTIM — Marseille, France
Master 2 in Quantitative Methods for Health Research — 2018 – 2019

Université Clermont Auvergne — Clermont-Ferrand, France
Master 1 in Applied Mathematics and Statistics — 2017 – 2018

Université Clermont Auvergne, CERDI — Clermont-Ferrand, France
Master in Health Economics — 2017

SOFTWARE (R PACKAGES)

survalis — Interpretable Survival Machine Learning Framework — CRAN · v0.7.1

- 19 Survival learners, 7 evaluation metrics, 8 interpretability methods · Maintainer

funcml — Functional Machine Learning Framework — R-universe

- Unified framework for functional machine learning in R · Maintainer

survdnn — Deep Neural Networks for Survival Analysis (R torch) R-universe

- Cox, AFT, and discrete-time neural survival models · Maintainer

tvrmst — Time-Varying RMST from Survival Matrices R-universe

- Dynamic RMST summaries for individualized survival curves · Maintainer

unsurv — Unsupervised Clustering of Individualized Survival Curves R-universe

- Phenotyping patients from predicted survival curves · Maintainer

mcstatsim — Monte Carlo Statistical Simulation Tools R-universe

- Functional approach to monte carlo simulation studies in R · Maintainer

missCforest — Ensemble Conditional Trees for Missing Data Imputation R-universe

- Missing data imputation using conditional forest ensembles · Maintainer

TEACHING

AI for Public Health — Aix-Marseille University, SESSTIM 2022 – Present

- Machine learning methods and NLP for public health · Master's students

Introduction to Biostatistics — University Mohammed VI of Health Sciences (UM6SS) 2021 – Present

- Descriptive and inferential statistics, statistical reasoning for health sciences · 100+ hours/year

Health Data Analysis and Machine Learning — Institut Mines-Télécom, IMT Atlantique 2020 – Present

- ML fundamentals, quantitative epidemiology, supervised and unsupervised learning · 21+ hours/year

Outside working hours: {**Methods in Health Data Science with R} — an independent course covering survival analysis, ML workflows, and reproducible research in R. Syllabus**

SELECTED TALKS

Comparison of missing data imputation methods in Cox regression with time-varying effects **2023**

***ISCB 2023, Rome* · El Badisy I. et al.**

Missing data imputation using a meta-algorithm metaCART: simulation under MCAR **2023**

EpiClin 2023, Nancy · **El Badisy I. et al.**

SKILLS

Methodological: Statistical methodology · Biostatistics and epidemiology · Survival analysis · Missing data methods · Meta-analysis · Interpretable machine learning · Computational biostatistics · High-performance computing (Slurm)

Technical: R (statistical and ML package development) · Python · Julia · Quarto / LaTeX · Git and GitHub · Reproducible research workflows
