PROFILE

Research Engineer in Biostatistics and Machine Learning, PhD, working at the interface of computational biostatistics and machine learning. Moroccan and French national, husband and father. I hold a PhD from Aix-Marseille University (SESSTIM laboratory), completed under the supervision of Pr Roch GIORGI, on missing data and machine learning imputation methods for survival analysis. My work focuses on building methodological tools for health data science supporting biomedical research projects. I develop open-source R packages for survival analysis, missing data, and interpretable machine learning, and contribute as a consultant and trainer in biostatistics and health data science.

EXPERIENCE

Mohammed VI Center for Research and Innovation Rabat, Morocco

(CM6RI)

Head of AI and Data Science Service

Nov. 2021 – Present

- Leading the AI and Data Science service
- Conducting methodological and applied research in health (oncology, fertility, other biomedical domains)

The GRAPH Network

Data Science Education Officer

Switzerland / Remote

Sep. 2023 – Dec. 2023

- Designed and delivered training programs in data science for global health
- Developed educational material and course content for data science learners

Institut Mines-Télécom, IMT Atlantique

Research Engineer in Applied Statistics

Brest, France

Sep. 2019 – Sep. 2021

- Conducted statistical analyses of national health data (SNDS-based analyses)
- Implemented automated and reproducible data workflows

INSERM

Biostatistician

Clermont-Ferrand, France

Jan. 2019 – Jun. 2019

- Conducted cost-effectiveness evaluation of a clinical protocol on ketamine for chronic pain

Université de Sherbrooke

Health Economist Intern

Sherbrooke, Quebec, Canada

Feb. 2017 – Sep. 2017

- Conducted a systematic review and meta-analysis on health utilities in cancer patients

EDUCATION

Aix-Marseille University, SESSTIM

PhD in Biostatistics

Marseille, France

2021 – 2025

Thesis: Missing Data and Machine Learning Methods for Survival Analysis · Supervisor: Pr Roch Giorgi

Aix-Marseille University, SESSTIM

Master 2 in Quantitative Methods for Health Research

Marseille, France

2018 – 2019

Université Clermont Auvergne

Master 1 in Applied Mathematics and Statistics

Clermont-Ferrand, France

2017 – 2018

Université Clermont Auvergne, CERDI

Master 2 in Health Economics

Clermont-Ferrand, France

2017

SOFTWARE (R PACKAGES)

survalis — Interpretable Survival Machine Learning

Framework

CRAN · v0.7.1

- 19 Survival learners, 7 evaluation metrics, 8 interpretability methods · Maintainer

funcml — Functional Machine Learning Framework

CRAN

- Unified framework for functional machine learning in R · Maintainer

survdnn — Deep Neural Networks for Survival Analysis (R torch)	CRAN
• Cox, AFT, and discrete-time neural survival models · Maintainer	
tvrmst — Time-Varying RMST from Survival Matrices	CRAN
• Dynamic RMST summaries for individualized survival curves · Maintainer	
unsurv — Unsupervised Clustering of Individualized Survival Curves	CRAN
• Phenotyping patients from predicted survival curves · Maintainer	
mcstatsim — Monte Carlo Statistical Simulation Tools	CRAN
• Functional approach to monte carlo simulation studies in R · Maintainer	
missCforest — Ensemble Conditional Trees for Missing Data Imputation	CRAN
• Missing data imputation using conditional forest ensembles · Maintainer

TEACHING

AI for Public Health — Aix-Marseille University, SESSTIM	2022 – Present
• Machine learning methods and NLP for public health · Master's students	
Introduction to Biostatistics — University Mohammed VI of Health Sciences (UM6SS)	2021 – Present
• Descriptive and inferential statistics, statistical reasoning for health sciences · 100+ hours/year	
Quantitative Epidemiology and Machine Learning — Institut Mines-Télécom, IMT Atlantique	2020 – Present
• ML fundamentals, quantitative epidemiology, supervised and unsupervised learning · 21+ hours/year	

Outside working hours: {**Methods in Health Data Science with R**} — an independent online course pathway covering applied biostatistics, survival analysis, machine learning, and meta-analysis with R. mhdsr.com

SELECTED TALKS

Comparison of missing data imputation methods in Cox regression with time-varying effects <i>ISCB 2023, Rome</i> · El Badisy I. et al.	2023
Missing data imputation using a meta-algorithm metaCART: simulation under MCAR	2023

SKILLS

Methods: Biostatistics · Survival analysis · Missing data · Meta-analysis · Interpretable machine learning

Tools: R package development · Python · Quarto/LaTeX · Git/GitHub · Slurm/HPC

Languages: Arabic (native) · French (fluent) · English (fluent)

Nationality: Moroccan · French
